

Turkish Barbers play a crucial role as community hubs where people gather for personal grooming which is influenced by Turkish culture. Barbers in Turkey follow barbering techniques that preserve the cultural heritage and identity of Turkish people, by maintaining mustaches and beards. But it is not customary for all Turkish people, although many people follow this tradition. Moreover, these barbering techniques highlight the artistry and skill of every Turkish barber. Social norms are typically reflected in the barbering practices in Turkey, which includes the cultural priorities of the Turkish people whom they serve. In this article, we will discuss the common services offered by barber shops in Turkey, notable trends in Turkish barbering within Turkey and the techniques which Turkish barbers use to promote their services in Turkey.

## Expert Haircuts & Grooming of Turkish Nation- Turkish Barbers:

### Common services offered by Turkish Barbers:

Turkish Barbers offers a variety of services to help people of Turkey look beautiful and adhere to Turkish traditions. Here is a look at some common services offered by every Turkish barber:

#### 1. Haircuts:

Turkish barbers provide haircuts and styles of classic trims by the combination of scissors, clippers and razors, which suit each client's preferences living in Turkey. The preferences of people of Turkey in terms of barbering techniques include buzz cuts, crew cuts and trims.

- **Buzz Cut:** Many people living in Turkey want a fresh look and they prefer a buzz cut, which is quite popular. Buzz cut is a barbering technique practiced by Turkish barbers in which hairs are shaved very short with clippers, which provides a neat look and simplicity. The buzz cut style is common among young men and teenagers.
- **Crew Cut:** Most Turkish people like crew cuts with the hair on top to be cut short and the sides are even shorter to look tidy and easy-to-maintain haircut.
- **Trim:** Many people in Turkey visit barbershops once in a week to keep their hair looking neat by cutting a little bit of hair.

## 2. Shaves:

Many Turkish barbers still practice artistic ways of providing traditional straight razor shave, which is famous for being very close and smooth. This classic method of shaving uses warm lather along with a hot towel, which makes the shaving experience for Turkish people relaxing and enjoyable. The straight razor shave is very popular in Turkish tradition of grooming, but modern alternatives are also becoming common in barbershops in Turkey. According to modern trends, some Turkish barbers use electric razors and disposable razors to fit individual needs and preferences. Nowadays, many Turkish barber shops mix old and new shaving techniques by offering advanced skincare treatments. Hot towel treatment and facial massages are the most common grooming packages offered by Turkish barbers that strongly focus on cleanliness. These stylish and trendy options in barbering appeal to the younger clients in Turkey. Despite the use of electric razors, the straight razor still serves an important part of Turkish barbering.

## 3. Beard Trimming:

For people who have beards, Turkish barbers trim and shape them with the help of clippers, scissors to make sure the beard looks neat.

## 4. Styling:

Turkish barbers maintain the style of people's hair for special occasions such as weddings, graduation, birthdays and other formal events. This might include:

- **Blow drying:** Turkish barbers dry and style the hairs of people of Turkey by a hairdryer. Styling the hairs may also add shape to the people's haircut with the help of gels and sprays.
- **Hair Coloring:** Many models, actors, photographers and musicians living in Turkey get hair coloring services from Turkish barbers.

## 5. Scalp Treatments:

In Turkey, barbers practice scalp treatments by massaging the scalp with special lotions and oils to help hair growth and exfoliating dead skin cells. In this way, every barber in Turkey uses barbering techniques to keep the scalp in good condition for Turkish people.

## **6. Hot Towel Treatments:**

Turkish barbers open up the pores of skin on the face of every customer with hygienic practice of hot towel treatment. Wrapping the hot towel on the face with warm water and applying special lotions and creams to make the skin softer and fresh are the best practices in almost every barbershop located in Turkey.

## **Modern Trends that are practiced by Turkish Barbers:**

Turkish Barbers offer tailored styles and precision cuts that cater to the need of elegant look and blends the different lengths of hairs seamlessly with clean look. For this, many barbers are practicing the use of modern clippers, and detailers.

- **Adjustable Clippers:**

Turkish barbers now use adjustable clippers with adjustable blades to offer various hair styles such as fade, taper, undercut, buzz cut and comb over to their clients. These adjustable clippers help Turkish barbers in changing the blade length to cut hair at various lengths.

- **Cordless Clippers:**

In barbershops located in various cities of Turkey, almost every Turkish barber is using cordless clippers which operate with batteries. These clippers are called cordless because Turkish barbers easily move around their clients without dealing with a cord or wire. In this way, Turkish barbers offer simpler and quicker haircuts by avoiding tangling up in wire

- **T-Outliners:**

Traditional Turkish barbers still use sharp knives without the innovation of T-outliners. Nowadays, T-outliners are present in every barbershop in Turkey and Turkish barbers use these tools in creating clean lines and neat appearances that suit the needs of their customers. T-blades inside T-outliners typically run with the help of a motor in controlling the speed and movement.

- **Detailed Trimmers:**

Nowadays, Turkish barbers use detailed trimmers to create clean edges and sharp lines when trimming hairs. Detailed trimmers consist of adjustable lever, T-blade, power switch and a charging port, that these barbers are facilitated with due to technology innovation.

## **Conclusion:**

In summary, Turkish barbers have been playing an important part for preserving the cultural heritage by cleaning the edges of beards and mustaches. The barbers of Turkey offer various haircuts to the people which include buzz cuts, crew cuts and trims. But the hair style varies according to the personal choice and preference of every individual living in Turkey. Nowadays, every Turkish barber maintains hygienic conditions while taking care of the face on the skin of their customers by offering them with the great services of hot towel treatment. Moreover, these Turkish barbers also practice modern technology such as replaceable blades, razors, adjustable clippers and T outliners to present an appealing look for their customers.
